DETAILED ACTION

Election/Restrictions This application contains claims directed to the following patentably distinct species of the claimed invention:

Any **one** of: an optical sensor (claims 56,23,2), or coating sensor (claims 10,75), or hyrorphone (claims 24,57) or geophone (claims 25,58) or strain sensor (claims 26,59) or pressure sensor (claims 27,60) or acceleration sensor (claims 28,61) or raman sensor (claims 29,62) or Brillouin sensor (claims 30,63) or fiber Brag sensor (claims 31,64) or chemical sensor (claims 32,65);

in combination with any **one** of: open end reflection (claims 4,74) or Z mismatch reflection (claim 5) or closed end reflection (claim 73);

in combination with any **one** of: positioning in a second well bore (claims 9,55) or single well bore (claim 54);

in combination with any **one** one of: measuring edge (claims 22,42) or cross correlation determination of time differential (claims 21,41);

in combination with any **one** of: positive pressure pulse (claim 81) or negative pressure pulse (claim 82);

in combination with any **one** of: surface positioning of generator (claim 90) or well bore positioning of generator (claim 91) or branch positioning of generator (claim 92).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the claims not listed above appear generic.

NOTE THAT APPLICANT MUST MAKE 6 SELECTIONS FROM THE 6 SUBGROUPS ABOVE, AS THOSE SIX SELECTIONS WILL RESULT IN A SINGLE EMBODIMENT TO BE EXAMINED.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
